therapy, educational
& sensory support

beyond expectations

Develop your mobility, independent living and communication skills through our affordable specialist outreach services and training. We support people of all ages with a range of disabilities, both in the community and at our centres in Harrogate and Bradford.

What we offer

1. Health and support services

Our qualified therapists can carry out an initial assessment and develop an individual package of support tailored to your goals. We offer a wide range of health and support services across our three specialist areas; physical therapies, communication and sensory support.

Physical

- Physiotherapy
- Hydrotherapy
- Therapeutic trampolining
- Occupational therapy

Communication

- Speech and language therapy
- Assistive technology

Sensory

- Mobility and orientation
- Braille and Moon
- Low vision support and training
- Independent living skills

2. Training services

We offer bespoke training for businesses and professionals working in a number of different settings including care and education. Our specialists can develop customised professional development courses delivered at one of our centres or at a location of your choice. Areas covered include disability awareness, dual sensory impairment, wheelchair mobility training, creating accessible resources and visual impairment awareness. Please contact us to find out more.

Where we work

We offer a full therapy programme at our purpose-built Harrogate site, including hydrotherapy and therapeutic trampolining. We can also deliver some of our specialist services e.g. mobility training and occupational therapy at our outreach centre in Bradford. Please contact us to discuss your individual needs and for details of prices and locations.

How we support people with disabilities to go beyond expectations

In 2015–16, Henshaws Therapy, Educational and Sensory Support team...

- Delivered over 1000 physical therapy sessions to build strength, increase flexibility and improve co-ordination
- Completed 75 mobility programmes to enable clients to travel safely and independently to access local facilities.
- Supported 59 people to communicate through Makaton, intensive interaction, PECS, Braille and British Sign Language
- Carried out 27 joint clinical and functional vision assessments to enable clients to use their vision effectively.

Emma's story

Emma worked with our speech and language therapist to give her the confidence to express her opinion and start conversations.

“ Before, Emma couldn't really say hello properly. Now her speech is fantastic. Hearing her sing in front of everyone was absolutely amazing. I can't praise Henshaws enough.”

Geraldine, mum to Emma, communication support client

Tom's story

Our specialist rehabilitation officers supported Tom to learn the route to travel independently to his work placement by bus. He also learnt transferable skills including safe food preparation techniques to support his goal of working in the food industry.

“ Catering always has been my passion. I've learnt to peel the veg first, then make sure I keep the knife straight. Henshaws staff have helped me become more confident and independent.”

Tom, sensory services client
