beyond expectations

4 using tech with dementia and sight loss

4. using tech with dementia and sight loss

Most tablets have in-built accessibility software that can help people with sight loss and dementia to use them

- iPads and other tablets are great for using picture communications, such as, creating pictorial schedules
- You can make the text bigger and bolder on Kindles

There are lots of useful apps available for phones and tablets; visit henshaws.org.uk/knowledge-village for more tips, tricks and tech.

There are a wide range of assistive devices and aids available that can help people to read. These include:

- Magnifiers, which are often available from the NHS
- Electronic magnifiers
- OCR – devices that take a photograph of text and convert it to speech
- OrCam – specialist glasses that read text for you and let you know who's in a room.

For more tips and tricks on how to deal with sight loss visit:
Contact Henshaws for specialist advice and support on technology. For more information and advice on sight loss and dementia, please contact us on 0300 222 5555.

we are here for you...

Henshaws is a charity that helps people living with sight loss and a range of other disabilities to achieve their ambitions and go beyond expectations. We believe that everyone has the right to an independent and fulfilling life. Our support, advice and training helps people and their families build skills, confidence and look forward to a positive future.
